Water Level Sensor (Pressure Type)

Model: SEN-VH-WLPNV

Description

The SEN-VH-WLPNV is a Water Level measurement with Water Temperature sensor used to monitor the water level / temperature of Ground / Surface water, dams, lakes, pools, aquatic ponds. The sensing device is potted in a stainless steel probe and coated with a sealant to withstand outdoor moisture. It is designed specifically to monitor water level/temperature. This sensor can be connected to data-logger, controller or to some display by means of electronic interface. If the level/temperature gets too high or low, the controller can then take the appropriate programmed action. The level/temperature can also be displayed on the console, in PC Access etc. One external Barometric Pressure sensor is required for Barometric pressure compensation. Comes with different ranges 10, 20, 50, 70, 100, 150, 200, 300 meters.

Specifications

Water Level

Sensor Type: Gauge Pressure Sensor

Settling time < 15 minutes after submersion

Repeatability: ± 0.05 % Full Scale Accuracy: ± 0.1 % Full Scale Overload Pressure 2 times Full Scale

Dimensions:

- 26 mm diameter
- 125 cm height

Applications

Determining the water level / temperature of Ground / Surface water,

dams, lakes, pools, aquatic ponds.

Water Level Sensor (Pressure Type)

Burst Pressure 4 times Full Scale Material: Stainless steel AISI 316L

Operating Environment: -40 to 70°C 0 to 100 % relative humidity

Input: 12-24 VDC

Output: RS485- (for level & Temperature)

Water Temperature (optional)

Range 0°C to 50°C Resolution

0.1°C

Standard Cable lengths: 10, 20, 50, 70, 100,

150, 200, 300 meters.

Ordering Guide

Output Model No.

1.RS485 O/P: SEN-VH-WLPNV-485-X-Y

Please mention measuring range (X) & Cable length (Y) information along with your enquiry / Purchase order.

Please mention input Voltage range information along with your enquiry / Purchase order Customized Ranges / Resolution / Outputs of sensor are available at extra Cost
